FOREWORD

Statistics for Profit is a summary of trade data designed to help Ontario manufacturers assess their market potentials at home and abroad. As complementary material to its companion publications, Ontario Exports by Countries and Ontario Exports by Commodities, it highlights the most important aspects of Ontario's trade opportunities.

When comparing the 1969 edition of *Statistics for Profit* with previous issues, certain important changes have been made. First, in addition to detailed import data of the U.S. and U.K., we are including import data of Japan and West Germany. These four countries account for over 89% of all Ontario exports. Secondly, for the first time, Ontario exports to the U.S. are broken down by commodities and regions. This regional breakdown of trade data will enable a more detailed study of the destination of Ontario exports within the U.S., thus helping exporters determine the region in which to concentrate their sales efforts.

Exports accounted for 21.1% of Ontario's gross provincial product in 1969; in comparison, Canadian exports made a 19.0% contribution to Canada's Gross National Product. In view of our small domestic market, exports are of vital importance to many industries. Canada and Ontario have been successful in expanding their industrial products exports apace with industrial development. In 1960, Canadian exports of "end products, inedible" were \$411.2 million, or 7.8% of total Canadian exports. This ratio has increased to 37.9% in 1969, or \$5,630.3 million in absolute magnitude. Though this is largely due to the Canada-U.S. Automotive Agreement, significant increases in exports have been recorded in such commodities as specialty machines, electronic products, office equipment, etc.

In terms of the geographic distribution of Canada's markets, relatively few changes have been recorded in 1969: The U.S. continued to dominate the market, accounting for 82.2% of all Ontario exports in 1969, far ahead of the second-largest customer for Ontario, the U.K.—the latter accounting for only 5.5%.

The largest item in Ontario's exports, "Road Motor Vehicles",

amounted to \$2.4 billion in 1968 and in 1969 it increased to \$3.2 billion, or 47.1% of total Ontario exports.

The overwhelming impact of the Auto Pact should not obscure the underlying trends in Ontario trade: apart from automobiles and parts, other Canadian products have expanded their sales in the U.S. The demand for such staple commodities as pulp, newsprint, petroleum, and non-ferrous metals is increasing, and markets for manufactured goods, especially specialty items such as scientific apparatus etc. showed some encouraging signs of development.

Apart from indicating market potentials abroad, the 1969 edition of *Statistics for Profit* includes Canadian imports of the statistical group "End Products—Inedible" for 1965-1969, which include the majority of fully manufactured goods. This data shows the potential of the Canadian domestic market, and points up the possibilities of import substitutes.

Data on Ontario and Canadian exports were taken from special D.B.S. statistical tables. U.S., U.K. and West Germany import data were obtained from the U.N. Commodity Trade Statistics. Details on Ontario and Canadian exports to other countries, not listed in this publication, can be obtained from Foreign Market Development Section,

Research Branch,
Department of Trade and Development,
950 Yonge Street,
Toronto 5, Ontario, Canada
(Tel. 365-4347).

To assist Ontario businessmen gain new markets for their products and enlarge existing ones, the Trade and Industry Division of the Ontario Department of Trade and Development offers free advisory service on a confidential basis. These services are available to any Ontario company interested in exporting products and services, acquiring new product lines, entering manufacturing agreements or joint ventures, or selling and buying know-how, patents and trademarks.

ABBREVIATIONS

For reasons of conformity, in *Statistics for Profit* we have used the same abbreviations that are used by the Dominion Bureau of Statistics in its publications, with the relative explanations.

Source: D.B.S. Trade of Canada Ontario Exports by Countries, 1969

SUMMARY OF ONTARIO EXPORTS

Ontario Exports in 1969 amounted to \$6,815 million. This represented a 14.1 % increase over 1968. Of the six broad commodity groups, "end products, inedible" showed the greatest increase: exports under this category rose by 24.8% in 1969 to reach \$4,444 million. As this group also constituted the largest

group in Ontario exports, fluctuations in the exports of this group affect the total significantly.

Aside from road motor vehicles, the major items in Ontario exports are nickel, pulp and paper, copper and aircraft. The following diagram shows the comparison between the 1969 and 1968 exports of these items:

OPPORTUNITIES FOR ONTARIO INDUSTRIES

Canadian imports increased from \$8.6 billion in 1965 to \$14.2 billion in 1969. This reflected our increased production capacity, our rising purchasing power and the upward trend in our standard of living. It also indicated the existence of international specialization, particularly in manufacturing industries.

Statistical data on Canadian foreign trade are classified into six broad sections. The following shows Canadian imports by sections 1965–1969.

	1965	1966	1967 (\$ millions)	1968	1969
Live animals	10.8	12.9	21.9	15.6	18.7
Food, feeds, beverages					
& tobacco	758.9	791.7	861.6	902.6	1,043.9
Crude materials inedible	1,006.3	1,023.5	1,062.8	1,126.7	1,054.8
Fabricated materials,					
inedible	2,114.4	2,233.1	2,310.2	2,434.6	2,905.4
End products, inedible	4,476.3	5,483.4	6,555.4	7,628.3	8,986.9
Special Transactions, trade	266.4	322.2	269.3	258.9	192.0

8.633.1 9.866.8 11.081.2 12.366.7 14.201.7

Source: D.B.S. Trade of Canada

Increases in total imports, compared with the previous years, were:

1966—14.3% 1967—12.3% 1968—11.6% 1969—14.8%

More significantly, the most important import section namely "End Products, Inedible", (manufactured goods) increased from 1965–1969 by 100.8%. This is of extreme significance due to the fact that manufacturing, has been and still is, one of the major contributors to our economic growth and development.

UNITED STATES IMPORTS AND CANADIAN EXPORT OPPORTUNITIES

United States is the largest customer of both Canada and Ontario, alone accounting for 71% of the former's and 82% of the latter's total exports in 1969. On the other hand, Canada is also the best customer of the United States.

In 1969, total U.S. imports amounted to \$38.8 billion, of which 28% came from Canada. The largest U.S. import group is "machinery and transport equipment," which amounted to \$10.5 billion in 1969. This is in large measure attributable to the Canada–U.S. Auto Pact, which led to imports of \$3.2 billion in road motor vehicles from Canada. The bulk of Canadian–U.S. and also Ontario–U.S. trade is concentrated in the Michigan–Ohio–Pennsylvania–New York–New Jersey area, where the bulk of U.S. auto industries and a large portion of the U.S. population can be found; the area's proximity to Ontario is also a contributing factor. The breakdown of U.S. imports and imports from Canada is shown below:

			Total U.S.	
		Total	Imports	
		U.S.	from	% From
SITC	Description	Imports	Canada	Canada
		\$	millio	n
0	Food and Live Animals	4,875.1	385.8	8.0

U.K. IMPORTS AND CANADIAN EXPORT OPPORTUNITIES

The U.K. is the second largest customer both for Canada as a whole and for Ontario. British imports were valued at US \$20 billion, and imports from Canada accounted for 5-6% of this market in 1969. Canada exported goods valued at \$1.1 billion to the U.K.

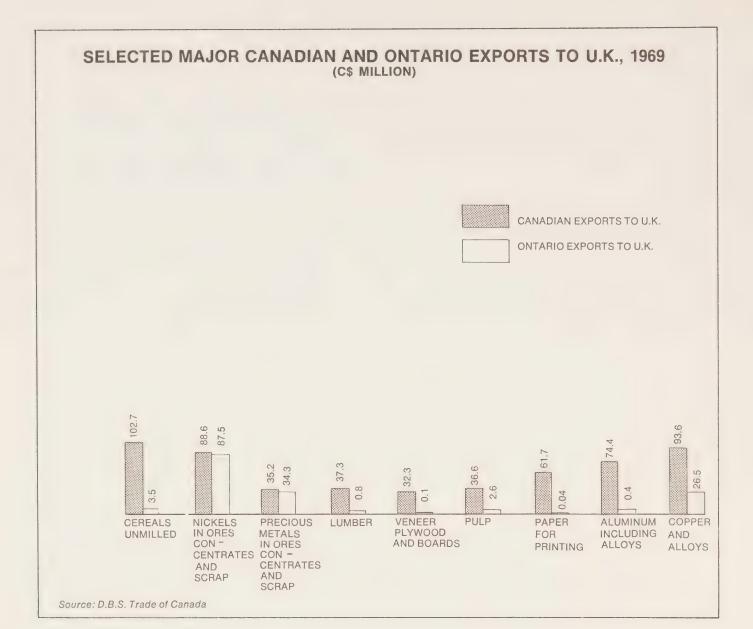

The category "manufactured goods classified chiefly by materials" was the largest group, in terms of value, in U.K. total imports, amounting to \$4.5 billion. This was followed by "food and live animals", which amounted to \$4.3 billion. Individually, however, the largest items in the U.K. import total were petroleum fuel and petroleum products and non-electrical machinery.

Among Canada's exports to the U.K., the largest group was also "manufactured goods classified chiefly by materials", but in terms of individual commodities, the largest items consisted

of such primary industrial products as pulp and paper, and such raw materials as nickel ore, iron ore, copper and aluminum.

Ontario exports to the U.K. in 1969 amounted to \$379.5 million. This represented 34% of all Canadian exports to the U.K., and a decline in Ontario's share from 37% in 1968. The largest items in Ontario's exports to the U.K. were as follows (1969):

\$54.3 million
\$87.5 million
\$34.3 million
\$26.5 million

Source: D.B.S. Trade of Canada Ontario Exports by Countries, 1968 and 1969

JAPAN'S IMPORTS AND ONTARIO EXPORT OPPORTUNITIES

Japanese trade was valued at \$30 billion in 1969. Japan's imports were valued at \$15.0 billion and exports \$16.0 billion.

To Canada and Ontario, Japan represents a fast-expanding trade partner: between 1967 and 1969, Canada's exports to Japan grew from \$574 million to \$626.2 million (or 9.1% increase), and Ontario exports increased from \$42.5 million to \$52.4 million (or 23.3% increase). In 1969, imports from Canada accounted for 4.5% of all Japanese imports.

The largest group in Japan's imports were "crude materials, inedible, excluding fuels". In 1969, this group amounted to \$5,770.0 million, or 38.5% of total Japanese imports. Canada's share in this category was largest in copper ores and concentrates (\$135.3 million) and sulphate bleached paper pulp (\$54.7 million). This was followed by "mineral fuels, lubricants and related materials", which amounted to \$3,290.7 million, or 21.9% of total Japanese imports. This reflected the pattern of the Japanese economy, which relied heavily on imported raw materials for its industrial development, and subsequently exported fabricated products fo finance such imports.

Of Japan's imports from Canada, classified by SITC and compiled by the Japanese Ministry of Finance, the largest group in terms of value was "crude materials inedible, excluding fuels" which amounted to \$424.0 million in 1969.

This accounted for 58.7% of total Japanese purchases from Canada. "Manufactured goods, classified chiefly by materials" accounted for 16% of the total, amounting to \$116.6 million. In terms of individual commodities, the largest items were unmilled cereals (\$82.6 million), oil seeds, nuts, and kernels (\$43.1 million), copper in ores, concentrates and scrap (\$133.3 million), lumber (\$39.2 million), pulp (\$62.4 million) and aluminum and alloys (\$60.7 million).

Ontario was responsible for only a very small part of Canadian exports to Japan: 8.3% in 1969, or \$52.4 million. This was largely due to the fact that none of the above-mentioned major items in Canadian exports to Japan originated in Ontario. The largest items in Ontario's exports to Japan were copper in ores, concentrates and scrap (\$8.4 million), nickel in ores, concentrates and scrap (\$7.7 million), zinc in ores, concentrates and scrap (\$5.3 million), other metal ores and concentrates and scrap (\$3.8 million), primary iron and steel (\$5.0 million) and office machines and equipment (\$3.9 million). Toys and sports equipment, which increased four times between 1968 and 1969 (from \$267 thousand to \$1.2 million) seem to have a promising market, as winter sports and camping are becoming more popular in Japan. But the bulk of Ontario trade with Japan was predominantly in the field of natural resources, and this is likely to obtain for the foreseeable future.

WEST GERMAN IMPORTS AND ONTARIO EXPORT OPPORTUNITIES

West Germany's total imports were US\$24.9 billion and exports US\$29.1 billion in 1969. Canadian trade with West Germany was valued at \$635.3 million; in 1969, Canada exported goods valued at \$280.6 million to West Germany and imported from it products valued at \$354.7 million. Although this represented a small fraction of West German trade, the continuing expansion in German domestic demand provided a favourable potential for Canadian and Ontario exports.

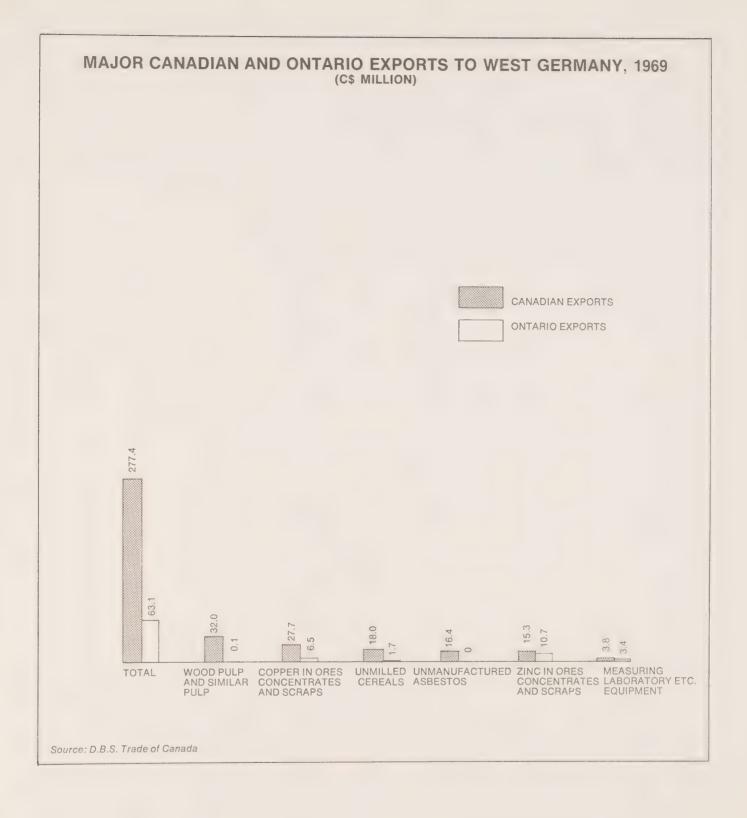

The largest group in West German imports was crude metals and its products, which amounted to \$4.1 billion in 1969, including imports of iron and steel (\$1.9 billion) and copper (\$1.2 billion). The second largest group was minerals imports, which amounted to \$3.7 billion. This category included mineral fuel and oil, which was the largest individual item of import, in terms of value, amounting to \$2.5 billion in 1969. Machines and apparatus was the third group, with \$3 billion of imports and including the second largest import item, boilers and other mechanical equipment, which amounted to \$2 billion.

Canadian exports to West Germany were \$280.6 million in 1969, an increase of 25% over 1968. Principal commodities were raw materials and semi-processed materials. The ten largest items were wood pulp and similar pulp (\$32.0 million), copper in ores, concentrates and scraps (\$27.7 million), unmilled cereals (\$18.0 million), unmanufactured as-

bestos (\$16.4 million), zinc in ores, concentrates and scraps (\$15.3 million), aluminum, including alloys (\$14.5 million), iron ores, concentrates and scraps (\$13.9 million), copper and alloys (\$13.1 million), other metal ores, concentrates and scraps (\$12.4 million) and other crude non-metallic minerals (\$10.7 million).

Ontario exports to West Germany were \$64.4 million in 1969, which represented 22.8% of total Canadian exports to that country. The composition of Ontario exports was slightly different from that of Canadian exports: thus while the largest items in the Ontario total were in both crude materials and fabricated materials, the bulk of Canadian exports to Germany was concentrated in crude materials. The most important items in Ontario exports were:

Oil seeds, oil nuts and oil kernels	\$ 2.4 million
Copper in ores, concentrates and scrap	\$ 6.5 million
Nickel in ores, concentrates and scrap	\$ 2.9 million
Zinc in ores, concentrates and scrap	\$10.7 million
Other metal in ores, concentrates and scrap	\$ 5.7 million
Plastics & synthetic rubber, not shaped	\$ 2.9 million
Copper and alloys	\$ 3.9 million
Measuring, laboratory, etc. equipment	\$ 3.4 million
Office machines and miscellaneous	
equipment	\$ 2.4 million

Source: D.B.S. Trade of Canada Ontario Exports by Countries, 1968 and 1969

ONTARIO EXPORTS TO THE U.S. BY REGION

The major markets for Ontario exports in the U.S. are the states of Ohio, Michigan, New York, New Jersey, Pennsylvania, Illinois, Indiana and Wisconsin. Together they accounted for just over 80% of the value of Ontario exports to the U.S.

Region	Ont. Exports % of Total Value 1969	Cdn. Exports % of Total Value 1969	Regional Population % of U.S. Total
Ohio, Michigan	50	31	10
N.Y., N.J., Penn	20	23	19
III., Ind., Wisc.	11	10	10
New England	3	7	6
California-Hawaii	2	4	10
Del., D.C., Md, W.Vir.			
Virginia, N.C.	3	4	8
S Carolina, Georgia, Fla.	2	2	7
Others	9	. 19	30
	100	100	100

There are a number of reasons for this dominance. First it should be noted that these eight States are among the most populous and most highly industrized in the United States. They also account for 40% of the total U.S. population. Secondly, they are the nearest states geographically, to the major industrial and agricultural centres of Southern Ontario. Finally, and most importantly, we have to consider the impact of the

U.S.-Canada Automotive Agreement on trade between Ontario and these eight states.

Thus, 41% of Ontario exports to Ohio-Michigan, 42% of exports to New York, New Jersey and Pennsylvania and 35% of Ontario exports to Illinois, Indiana and Wisconsin in 1969, consisted of Road Motor Vehicles and Parts.

Another major commodity traded between Ontario and these three regions is forest products. In 1969, this group accounted for 25% of Ontario's exports to Illinois, Indiana and Wisconsin, especially in the form of wood pulp and paper for printing. In the same year forest products represented 4% of Ontario exports to Ohio-Michigan and 8% of the total value to New York, New Jersey and Pennsylvania.

Ontario domestic exports to the U.S. grew by 19% between 1968 and 1969. Exports to the New England states grew less than the average. There was a strong growth in exports to Ohio and Michigan (+22%), to New York, New Jersey and Pennsylvania (+28%), and to the Dakotas and Minnesota (+25%). The only major market that showed an actual decline was California-Hawaii (–22%). The export pattern to the other regions was varied.

Ontario exports to the U.S. are much more regionally concentrated than are Canadian exports. Thus, while Ohio, Michigan, New York, New Jersey and Pennsylvania accounted for 70% of the Ontario total to the U.S., their comparable share of Canadian exports was only 54%.

ONTARIO EXPORTS TO THE U.S. BY COMMODITY AND REGION

In 1969, Ontario exported *live animals* to the U.S. valued at \$21.7 million. The major part (41%) of these exports went to the Mid-Atlantic States (New York, New Jersey and Pennsylvania). The East-North-Central Region (Ohio, Michigan, Illinois, Indiana and Wisconsin) accounted for 25% of the total and the South Atlantic States (those which border the Atlantic between Delaware and Florida) took 12%. The main product exported under this category was cattle.

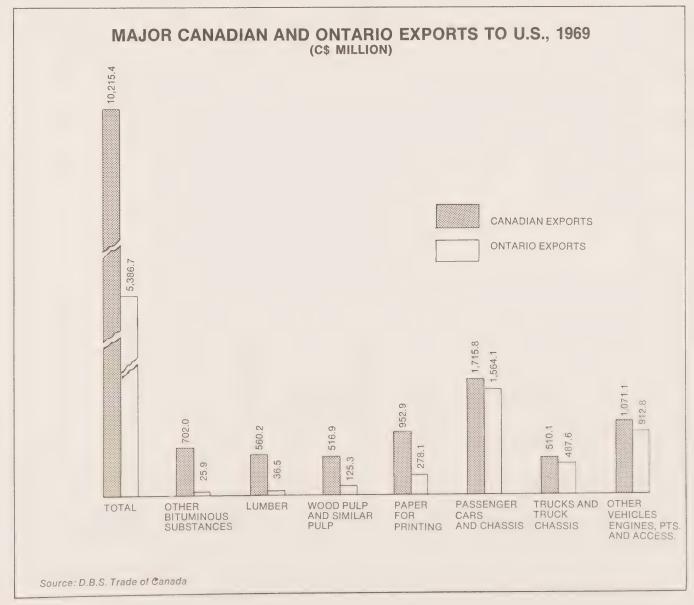

Food, Beverages and Tobacco exports to the U.S. from Ontario were valued at \$219.7 million. Over half of these went to the Mid-Atlantic and the East-North-Central States, mostly exports of meat and distilled alcoholic beverages (mainly Canadian whisky).

The U.S. imported *Crude Materials* from Ontario were valued at \$262 million. Almost three-quarters of this went to the Mid-Atlantic and East North Central States. The major items exported to the Mid-Atlantic region were iron ores concentrates and scrap; nickel ores concentrates and scrap, and other crude bituminous substances. The main items exported to the

East North Central region were iron and nickel ores, concentrates and scrap.

Ontario's exports of fabricated materials went primarily to the East North Central States: Ohio, Michigan, Illinois, Indiana and Wisconsin, which took 45% of the total value of exports in this category. The major items were wood pulp, paper for printing, nickel and alloys, castings and forgings, and plate, sheet and strip steel. 22% of Ontario exports of fabricated materials to the U.S. went to the states of New York, New Jersey and Pennsylvania. Here also wood pulp, paper for printing and nickel alloys were among the most important export items. In addition, precious metals were an important exports to these Mid-Atlantic states.

80% of *end product* exports from Ontario to the U.S. went to the East-North-Central and the Mid-Atlantic regions. The dominant exports to the East North Central states were passenger automobiles and chassis, trucks and truck chassis, and other vehicles engines parts and accessories. The same pattern applied to the Mid-Atlantic states.
